## Mphasis, Government of Alberta and University of Calgary partner to accelerate the development of Quantum Computing ecosystem in Calgary

---

Together they launch 'Quantum City COE' to within 'Sparkle Calgary' to build solutions for the commercial application of quantum computing for AI and machine learning

---

(CALGARY, ALTA.) [Mphasis \(BSE: 526299; NSE: MPHASIS\)](#), an information technology solutions provider specializing in cloud and cognitive services, Government of Alberta and the University of Calgary (*UCalgary*) together announced a strategic partnership to:

- Spur economic growth and high-quality job creation within the technology sector in Alberta; will create 500 - 1000 technology jobs
- 'Sparkle Calgary' by introducing experiential learning programs with Mphasis proprietary platform
- Establish Quantum City Centre of Excellence (CoE) to strengthen the UCalgary innovation ecosystem by creating a hub for companies focused on the commercial development of Quantum technologies.

Speaking at the virtual inauguration, **Premier Jason Kenney, Alberta Province, Canada** said, "We are proud to be home to an innovative endeavour such as the Sparkle Calgary Technology Centre that brings together tech leader Mphasis, and the University of Calgary, to enhance the future of our budding tech talent. We will work together to jointly expand Alberta's capacity to generate highly-qualified personnel to support growing industry needs on a local, national and international scale."

"The Quantum Computing lab at UCalgary aligns with Mphasis' expertise and partnerships in Alberta's Research and Innovation Framework (ARIF) which covers diverse industries such as Financial Services, Logistics, Energy, Space, Clean Tech, Climate and Environment, Biotech amongst many others. We are delighted that this collaboration will elevate Mphasis' expansion of its operations in Canada, while promoting the Province's position as a global hub for next generation technology, including quantum computing," said **Nitin Rakesh, Executive Director & CEO, Mphasis**.

"This is the start of something big," said **Ed McCauley, President of UCalgary**. "Thanks to the people and technology cultivated at Quantum City, Calgary's economy will grow and diversify. Quantum technologies often sound like science fiction today, but they will sound like pay cheques tomorrow. This is how great research universities improve their community and it's a great day for UCalgary."

UCalgary, in association with Mphasis, is pursuing the development of an AI-driven personalized learning experience. This capability will be further extended and commercialized for the global education market

"Mphasis' decision to put their Canadian headquarters in Calgary reflects our city's growing reputation, and our global recognition, as a burgeoning technology ecosystem. It is through the culmination of hard work from partners like the

University of Calgary, Calgary Economic Development and Invest Alberta that companies know Calgary as the destination of choice for the world's best entrepreneurs who embrace innovation to solve the world's biggest challenges," said **Calgary Mayor Naheed Nenshi**. "And our mission to India last year gave us the opportunity to solidify the relationship and take part in some meaningful dialogue with Mphasis' executives to ensure they heard first-hand about our amazing community.

"Invest Alberta recognizes the transformative potential of applied technology to innovate business practices, and the critical work of IT firms. We believe that Mphasis, with its blend of innovative technology and services will strengthen Alberta's technology portfolio and empower the province to become a global technology hub and leader in IT, quantum computing, blockchain, fintech, data, and artificial intelligence," **David Knight Legg, CEO, Invest Alberta Corporation**.

"We are thrilled that Mphasis selected Calgary as their North American Quantum Computing hub. As we grew our relationship with the Mphasis team over the last several years, Calgary emerged as the natural fit given our extraordinary programming at post secondaries like the University of Calgary. Mphasis is known globally for their cloud and cognitive services, and they will help propel Calgary's growing tech ecosystem to new levels and create hundreds of local jobs," said **Patrick Mattern, Vice President Business Development, Calgary Economic Development**.

## ABOUT MPHASIS

[Mphasis](#) (BSE: 526299; NSE: MPHASIS), applies next-generation technology to help enterprises transform businesses globally. Customer centricity is foundational to Mphasis and is reflected in Mphasis' [Front2Back™](#) Transformation approach. Front2Back™ uses the exponential power of cloud and cognitive to provide hyper-personalized (C=X2C<sup>2</sup><sub>TM</sub>=1) digital experiences to clients and their end customers. Mphasis' Service Transformation approach helps 'shrink the core' through the application of digital technologies across legacy environments within an enterprise, enabling businesses to stay ahead in a changing world. Mphasis' core reference architectures and tools, speed and innovation with domain expertise and specialization are key to building strong relationships with marquee clients.
